After further review the examiner noticed that the limitation of “the terahertz band” is not positively recited in the independent claims. Therefore, a prior art reference such as 6,461,351 to Woodruff et al. would be appropriate as a 102/103 rejection because the pulse rate of the RF generator can be adjusted to the terahertz range (see col. 9, lines 14-23).

Note: your device is designed to provide a continuous wave.

Please consider these comments and amend the claims accordingly with the purpose of placing the application in condition for allowance.

Please feel free to phone the examiner to discuss in detail.
